

Sheetfed Offset

Compound Shore A
125 25

Form Dampening Roller

Alcohol-Reduced and Alcohol-Free Printing

- Form dampening roller for conventional inks
- IPA-reduced and IPA-free printing

Application

- Very good and even dampening properties with IPA-reduced and IPA-free printing
- Supports a clean print with less fountain solution by a very even surface
- High Resistance to fountain solutions with a high content of IPA-substitutes

Features

- Compound 125 25 is not to be used together with UV inks or hybrid inks.
- We recommend compound 125 25 in combination with compound 147 25 and 128 25 ProAqualis as water pan/metering roller

Note

- Reduced ink feed-back
- Very stable dampening
- Great dampening range also in case of IPA-free printing
- Reduced waste paper on print start
- Stable print process

Benefits
